

# Secure attractive long-term energy prices

## ewz.festpreis

**With ewz.festpreis, you benefit from an attractive electricity price with long-term protection from price increases for up to three years.**

The electricity supplied by ewz is completely renewable. In addition, electricity with added ecological value can be purchased in various proportions. Through our own production as well as significant trading volumes, we offer the best solution for every requirement at an attractive price.

### The benefits to you

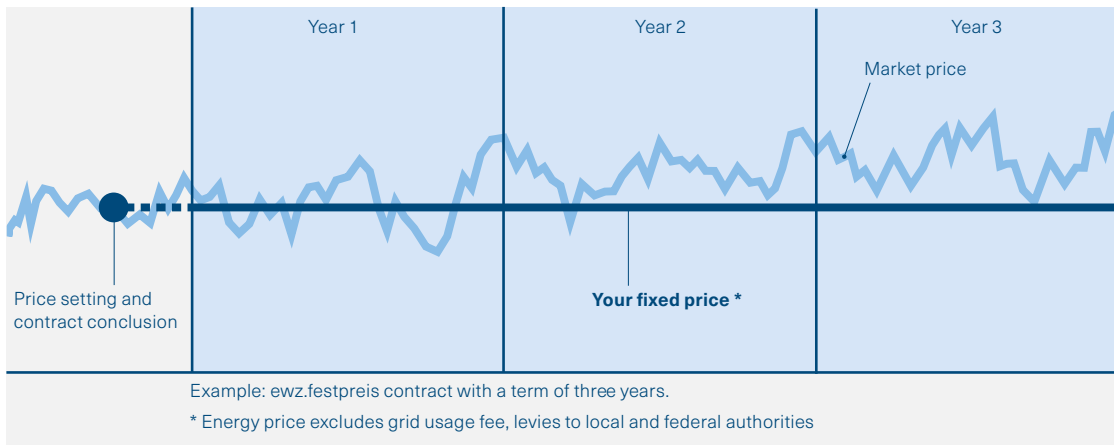

- **Attractive:** benefit from attractive energy prices in the long term with our procurement pool of 4 TWh. We will calculate and issue a quote based on the individual requirements of your company.
- **Calculable:** your energy price remains the same throughout the entire term, so you're protected from price increases.
- **Sustainable:** electricity from ewz is completely renewable. In addition, electricity with added ecological value can be purchased in various proportions.
- **Secure:** over 2,000 qualifying companies throughout Switzerland already get their electricity from ewz.
- **Simple:** switching to ewz.festpreis is straightforward. Simply place your order, and we'll take care of the rest.

**Everything we need for our organic bakery comes from environmentally friendly production. That includes electricity from renewable energies.**

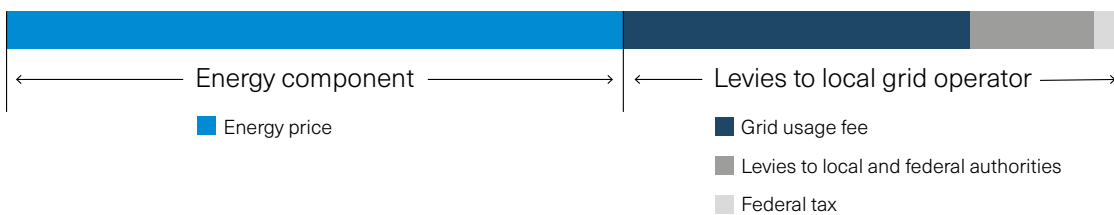

Lotti Scharrenberg,  
Manager, Scharrenberg Vollkornbäckerei (ZH)

## How does ewz.festpreis work?

## Composition of the electricity price

Does your company consume more than 100,000 kWh of electricity in a year? If so, then you have free choice of suppliers for the energy component of your electricity, so you can benefit from attractive market prices and flexible conditions. Grid usage fees and levies are regulated by EICOM and paid to your local grid operator as normal. The diagram below illustrates the typical composition of electricity prices in Switzerland.

## Electricity with added ecological value – your commitment to our environment

Complete sustainability – upgrade your electricity supply to include electricity with added ecological value. You'll be helping to minimise the environmental impact of the overall energy mix, while also promoting the production of renewable energy in Switzerland. We'd be happy to advise you.
