

Hardau heat network Pricing

Connection

By connecting to the heating network, you're involved from the outset and benefit from environmentally friendly heat produced from 80 per cent renewables.

Example calculation: connection to heat supply

Assumptions

Connected load	250 kW
Energy consumption per year	600,000 kWh
Number of homes	50

One-off connection fee	determined on an individual basis
------------------------	-----------------------------------

Base price	CHF 51,250 per year
------------	---------------------

Price for heating	CHF 63,000 per year
-------------------	---------------------

Energy price, total (without taking the one-off connection fee into account)	CHF 0.190 per kWh
---	--------------------------

Cost per home	CHF 2'285 per year CHF 190 per month
---------------	---

Proportion of renewable energy	80%
--------------------------------	-----

Connection fee

Depends on the connection and system costs

Base price

Base price for heating	CHF 205 per kW per year
------------------------	-------------------------

Price for heating

Heat (from 80 per cent renewable energy)	0,150 per kWh
--	---------------

All prices are index-linked and exclude VAT.
